DRY ABSORB

CORDEXPACK DRY ABSORB

CORDEX DRY ABSORB – Moisture damage during container transport is costly and unpredictable. When you require your products to arrive at their destination in a safe and dry environment, desiccant bags are your moisture prevention solution to extending the longevity of your packaged goods. These actively attract moisture from the surrounding air which reduces the risk of cargo damage due to condensation.

When it comes to transporting cargo, each shipment is unique and requires a specific approach in determining the optimum amount of desiccant needed. Factors to consider:

- The number of days your goods are in transit
- Temperature variances
- Mode of Transport

It is critical to understand how sensitive your cargo is to moisture damage as this can vary from shipment to shipment

We assist in determining the correct desiccant required for shipping your products and will ensure your cargo arrives at its destination moisture and damage-free.

MOISTURE ABSORPTION DESICCANTS DRY ABSORB

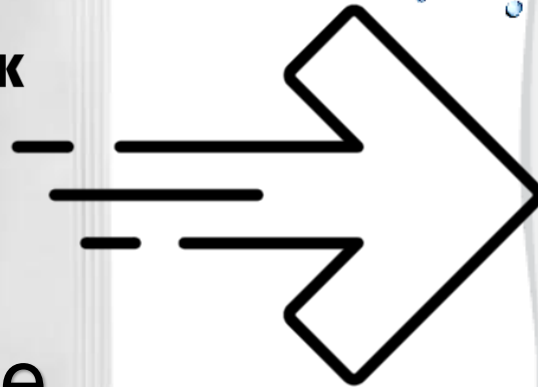

Why Choose Us

Cordexpack™ Dry Absorb is the higher-performing, more eco-friendly moisture absorber for protecting your products throughout the supply chain. You will no longer experience product damage or the production slow-down caused by spillage and breakage of traditional grain or pellet-based packets. And, with more shipping-friendly dimensions, many companies using Simple Dry report money savings through reduced shipping and storage costs.

- REDUCE COSTS AND SAVE
- ACCELERATED HUMIDITY CONTROL
- SAFETY AND LIABILITY MITIGATION

We provide solutions for Freight Forwarding and warehouses throughout India. Our products can be specifically tailored to meet any of your business's logistical requirements.

MOISTURE ABSORPTION DESICCANTS DRY ABSORB

CORDEXPACK DRY ABSORB

Contents form a gel once water is absorbed.

Absorbs 1.5 Liters of water per 500g bag

Leak-proof with our advanced, unique membrane technology.

Exclusive Hanger tool for easy installation.

Hangs in container recesses.

Available in single 500g or 1kg bags
